SUMMARY

Data-driven Product Manager with experience in SaaS and fintech products, specializing in product analytics, AI-assisted workflows, KPI-driven decision-making, and scalable analytics platforms. Skilled in product discovery, roadmap planning, cross-functional collaboration, and translating complex business data into actionable insights and measurable product outcomes.

SKILLS

- **Product Management & Analytics:** Product Strategy, Product Discovery, Product Lifecycle Management, Feature Prioritization, Roadmapping, Product Analytics, KPI Monitoring, Data-driven Decision Making, User Research, A/B Testing, Behavioral Analytics, Business Intelligence, Dashboarding
- **Data Analytics & Visualization:** SQL, Python, ETL Workflows, Data Cleaning & Transformation, Statistical Analysis, Hypothesis Testing, Regression Analysis, Data Visualization, KPI Reporting
- **AI & Automation:** AI-assisted Workflows, ML Algorithms, Hugging Face, Workflow Automation, ML Pipeline Orchestration, Apache Airflow, Vector Databases (Pinecone, Weaviate, pgvector), Schema Mapping
- **Cloud, Data Infrastructure & Engineering:** AWS, GCP, Google Cloud SQL, MySQL, Supabase, Databricks, Streamlit, API & SaaS Integrations, GitHub
- **BI, Reporting & Productivity Tools:** Power BI, Tableau, Microsoft Excel, Excel VBA, Google Analytics, SAS Visual Analytics, JMP, Sigma, Jira, Trello, Salesforce, Confluence, Notion, Slack
- **Collaboration & Operations:** Agile & Scrum, Cross-functional Collaboration, Stakeholder Management, Process Mapping, Workflow Optimization

EXPERIENCE

Product manager

Zen Wealth | USA

June 2025 – Present

- Owned end-to-end product development for multi-tenant SaaS analytics and AI-native debt collections platforms, driving product discovery, PRDs, roadmap planning, and sprint execution across engineering, AI, design, and business teams while improving delivery efficiency by 30%.
- Worked closely with data engineering and frontend teams to build scalable ETL architecture and tenant-isolated pipelines, enabling reliable KPI reporting and centralized dashboards that improved operational visibility for SMB customers by 40%.
- Defined product requirements and integrations across CRM, accounting, marketing, payment, and time-tracking platforms, helping customers unify fragmented operational data and reduce manual reporting efforts by 35%.
- Helped take the platform from prototype to production-ready within two quarters by delivering multi-channel borrower experiences across SMS, WhatsApp, voice, and email, including AI voice agents, in-chat payments, and compliance-ready audit trails.
- Developed GTM playbooks, ICP segmentation, and positioning strategies for AltFi, BNPL, auto finance, and healthcare lending markets across the US, India, and APAC, while using user feedback, personas, and rapid prototyping to refine MVP direction and product-market fit.

Product manager

CRED | India

July 2022 – July 2023

- Led product initiatives focused on user engagement, transaction experience, and customer retention for fintech products, contributing to a 22% improvement in user engagement metrics.
- Analyzed customer behavior, product funnels, and usage metrics to identify drop-off points, improving conversion rates by 18% through A/B testing and data-driven experimentation.

- Partnered with cross-functional teams to define product requirements and prioritize roadmaps, helping deliver scalable features aligned with business KPIs and customer experience goals.
- Built dashboards and reporting frameworks using SQL and Power BI, reducing reporting turnaround time by 35% and improving visibility into campaign and operational performance.
- Worked with data and engineering teams to streamline workflow automation and improve reporting accuracy, increasing operational efficiency by 28%.
- Supported agile product development through sprint planning, backlog prioritization, stakeholder communication, and release coordination, improving sprint delivery consistency by 25%.

ACADEMIC PROJECTS

Loan Default Prediction Model	May 2025
• Built XGBoost model with engineered KPIs for risk classification. • Deployed real-time prediction UI using Streamlit, with SHAP-based explainability and KPI dashboards. • Achieved 99% accuracy, 1.00 recall, enabling financial behaviour modelling and user segmentation. BellaBeat	

Marketing Analytics	March 2025
• Cleaned and processed 1.3 million rows of minute-level Fitbit activity, sleep, and heart rate data using Python and XGBoost to improve dataset completeness. • Applied K-Means clustering on Fitbit data to derive 4 customer segmentation based on activity, sleep, and BMI. • Built interactive dashboards (Streamlit + Sigma) for behavioral trend analysis and persona-based GTM.	

Employee Welfare Analysis (HR Analytics)	November 2024
• Ran regression, MANOVA, z-tests on 5-year HR data; mapped job strain via Demand-Control Matrix. • Found gender-based variance in job control and home demands; validated hybrid work model. • Built interactive dashboards with workforce segmentation, enabling UX-driven workplace policy.	

EDUCATION

MS -Global Business Analytics Virginia Tech (NVC, VA)	Jun 2024 - May 2025
B.S., Information Technology Virginia Tech (Blacksburg, VA)	Aug 2023 - May 2024
B. Tech, Computer Science (Data Science) NMIMS University (Mumbai, India)	Aug 2020 - May 2023

CERTIFICATION

• Base SAS and Visual Analytics	2023
• Google Analytics	2024
• Digital Marketing Analytics Internship	2024
• AWS Cloud Practitioner	2025
• McKinsey Forward Program	2025
